JASON NAVON

Huntingdon Valley, PA, 19006 | 610-203-3911 | jasonanavon@gmail.com

SKILLS SUMMARY

Technologies: HTML, CSS, Javascript, JQuery, Git, ReactJS, Node.js, Express, MongoDB, MySQL, Bootstrap

PROJECTS

Star Explorer | https://github.com/Jrherrera333/star-explorer|
- A web application designed to allow users to input the parameters of stars and planets.
- **<additional detail about collaborative elements or individual contributions>**
- **Tools used:** React.js, MongoDB, Mongoose, HTML, CSS, JWT

Employee Database | https://github.com/godot23/Employee_Database|
- An application that allows users to input, edit, and delete user information from an employee database. Back-end only.
- Responsible for entire build.
- **Tools used:** Express, SQL, JS
-

Jeopardy | https://github.com/KevalPatel6/Jeopardy|
- A web application that mimics the hit TV show Jeopardy. Using the Jeopardy database API, auto populates a board with random questions. Users can then play a game of Jeopardy and attempt to beat their high scores.
- **<additional detail about collaborative elements or individual contributions>**
- **Tools used:** Restful API, JS, HTML, CSS, Bootstrap
